Adults with HIV/AIDS		0	0
Adult Survivors of Domestic Violence		1	1

# Methodology for PA-501 - Harrisburg/Dauphin County CoC

## Sheltered Population Total

**1. What data source(s) was used to produce the total number of people included in the sheltered population (staying in an emergency shelter, Safe Haven, or transitional housing) on the night of the count? Please indicate the percentage of the PIT count derived from each of the sources. (If a source was not used, please enter zero).**

HMIS Data	80%
Provider-level surveys	5%
Client-level surveys	15%
Observation	0%
Other	0%
<b>Total</b>	<b>100%</b>

**2. Was the CoC able to collect information about the number of people being sheltered on the night of the count from all emergency shelters, Safe Havens, and transitional housing projects listed on the HIC or only some? listed on your HIC or only some?**

- Complete census count

**3. What information or method(s) was used to de-duplicate the count of the total number of people included in the sheltered population?**

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number
- Comparison of unique client identifiers (not PII)
- Interview/survey question(s) with screening questions (e.g., have you already completed a count survey)

## Sheltered Subpopulation

**4. Looking at the change in your sheltered count from last year's count, please choose the three reasons you believe best explains these changes from the drop-down list below**

- Change in number of volunteers for PIT count

- Change in emergency shelter capacity
- Change in weather-related conditions

**Please provide a brief description of these specific factors (500 word limit):**

Our shelters were maxed including our overnight. At one overnight however, the volunteers were new and although trained there was a mix up in dates and they were only able to capture 6/20 participants when checking with the following day. So there is that undercount.

Cold weather PIT has brought many of unsheltered to winter overnight shelters, otherwise our unsheltered numbers when those seasonal shelters are over, would be higher.

## **Unsheltered Population**

**5. What approach(es) was used to count the total number of people included in the unsheltered population during the PIT count? (select all that apply)**

- "Night of the count" - census

**5a1. Did you cover the entire geography of your CoC during the night of the count?**

**5a1a. What were the reasons you were unable to cover the entire geography (select all th**

- "Night of the count" - known locations only

**5b. How did the CoC select the areas that were included for canvassing?**

- An effort was made to use local knowledge (such as outreach workers and other local expertise) locations (e.g., areas with known concentrations of people experiencing unsheltered homelessness)
- Data from prior PIT counts

**6. Were certain areas within the CoC geography specifically excluded because the CoC had reason to believe there were no unsheltered people in those areas based on prior knowledge/experience?**

- No

at apply)?

to target known  
is)

on to believe

**7. Did the CoC adjust the information in some way (e.g., statistical adjustment or extrapolation) to areas within the CoC geography that were not canvassed but where unsheltered people might have been on the night of the PIT count?**

- No

**8. Were certain areas within the CoC geography specifically excluded because of concerns related to safety?**

- No

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number

- Comparison of unique client identifiers (not PII)

- Interview/survey question(s) with screening questions (e.g., have you already completed a count survey)

## **Unsheltered Subpopulations**

**10. Looking at the change in your unsheltered count from last year's count, please choose up to three reasons that best explain these changes from the drop down list below. Please also provide a brief description of these specific factors (500 word limit).**

- Change in implementing the PIT count (Select all that apply)

- Other:

**Please provide a brief description of these specific factors (500 word limit):**

› account for  
ve been on the

d to public health

**9. What information or method(s) was used to de-duplicate the total count of people in the unsheltered population? (Check all that apply)**

- Change in volunteers for PIT count (e.g., increase or decrease in volunteers overall, increase or decrease in volunteers with prior experience, included volunteers from law enforcement in implementation but did not in prior year)

Please provide a brief description of these specific factors and how these changes affected PIT count implementation

We had more volunteers this year which was helpful.

We had a camp closure just the week before due to health concerns and that may have affected numbers

We had more volunteers this year which was good. However, there was a major camp closure for health concern that disrupted unsheltered just the week prior to PIT, and ,therefore, we may not have been able to locate and find everyone during the temporary transition, even though we were assisting as all who wanted and needed our help.
